Product Highlights

Here are the key features of Quick Heal Anti-Fraud that provide strong protection against scams.

Fraud Call Alert

Alerts you on receiving a potentially fraudulent call.

Fraud Call Alert instantly checks incoming calls from unknown numbers to identify potential scams, protecting you from fraudulent activity.

Banking Fraud Alert

Alerts when you are on a call that may potentially lead to fraud.

Banking Fraud Alert instantly detects suspicious calls and alerts you in an ongoing conversational call, which could lead to financial fraud. Fraudsters often trick people into sharing sensitive information like OTPs and passwords when on call, resulting in financial loss.

Scam Protection

Protects you from phishing link scams.

Scam (Phishing) Protection detects and blocks fraudulent links, safeguarding you from phishing scams that aim to steal your personal information through fake emails, messages, or websites.

Fraud Protect Buddy

Helps protect your loved ones from banking fraud.

Fraud Protect Buddy enables you to add loved ones who may be susceptible to fraud. This feature safeguards your loved ones from financial fraud by alerting you to the suspicious calls they receive.

Fraud App Detector

Alerts you on detecting a fraud app.

Fraud App Detector proactively identifies and alerts you to potentially harmful apps that steal information, spy on you, infect your device, etc. It protects you from unauthorized access to your information.

Unauthorised Access Alert

Alerts you when an app uses Mic/ Camera while the device is not in use

This feature protects your privacy by notifying you when apps access your microphone or camera without your permission.

Secure Payments

Secures all your online transactions from frauds.

Secure Payments analyzes payment apps and device security to ensure safe online transactions. It alerts you to potential risks like compromised devices or unauthorized access, safeguarding your online payments.

Dark Web Monitoring

Secures all your online transactions from frauds.

Dark Web Monitoring keeps an eye on and tracks the dark web for leaks of your personal information like email, passwords, phone numbers, or credit card numbers being shared, enabling you to take preventive action against fraud.

Call Forwarding Alert

Alerts you when your calls are being redirected.

Call Forwarding Alert notifies you when your calls are redirected to another number, helping you prevent fraudsters from stealing your information. You can modify your settings and disable call forwarding.

Payee Name Announcer

Helps you avoid QR code scams

Payee Name Announcer verifies the recipient of your QR code payments by announcing the payee's name, preventing fraudulent transactions.

Screen Share Alert

Alerts you if your screen is being shared, while on a call.

Screen Share Alert protects your privacy by notifying you when apps attempt to share your screen during calls. This feature helps you to safeguard your personal information and take control over how your data is being collected.

Spy Alert

Protects your browsing activities and history from unauthorized access and misuse.

Spy Alert protects your privacy by blocking websites from tracking your online activities, and keeping your browsing record private.

File Vault

Creates password-protected locker

File Vault creates a secure, encrypted locker on your device to protect confidential data like documents, files, photos, and videos.

Webcam Protection

Alerts you when your device webcam is being accessed without your consent.

Webcam Protection scans malicious apps that invade your privacy, it alerts you by detecting and blocking apps that attempt to access your webcam.

Email Protection

Protects you from infected and phishing emails

Email Protection saves your device by blocking infected attachments like malware, viruses, or spam in incoming emails.

Browsing Protection

Blocks access to malicious or fraudulent websites

Browsing Protection safeguards your device by blocking access to malicious websites. This feature keeps you away from potential threats while you browse the internet.

Backup & Restore

Offers secure data backups, efficient backup management, and seamless data restoration.

Backup & Restore enables you to create and manage backups of your crucial data, providing a safety net in case of ransomware attacks.
