Smarter, faster, AI-driven shield against evolving digital threats.

Your personal security guide: instant answers, easy help.

One login. All devices.
Protection simplified

Quick Heal's Next-Gen Cyber Security Solutions are powered by GoDeep.AI

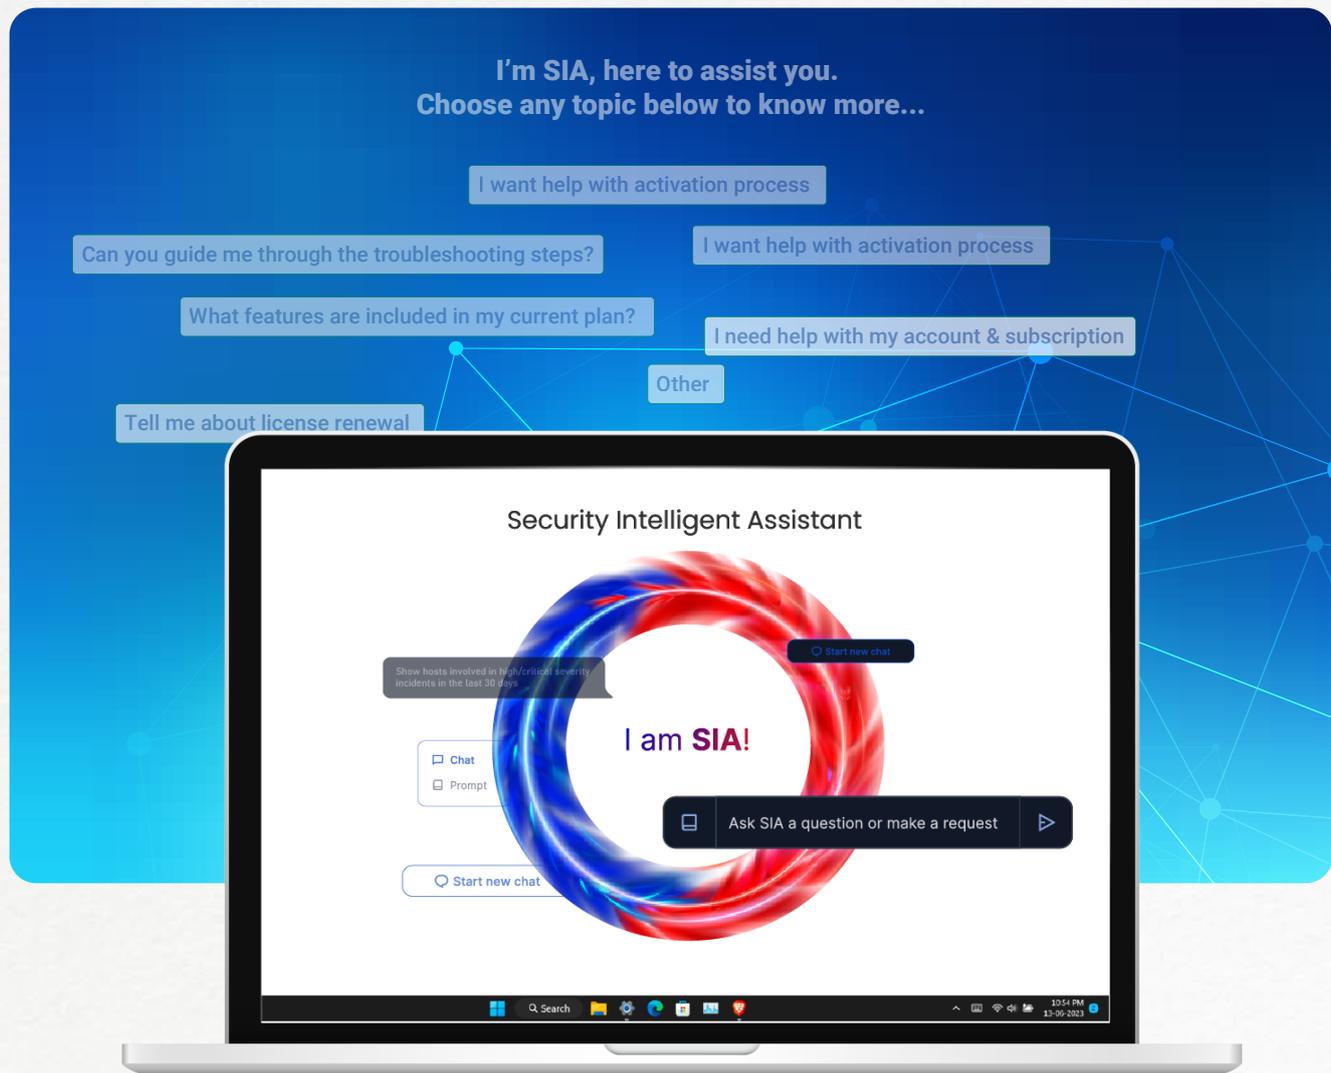

GoDeep.AI is a cutting-edge malware-hunting technology powered by Artificial Intelligence.

Our **Deep Learning** Module learns and remembers every historical malware threat and stores the learnings in a centralized cloud. It feeds the **Artificial Intelligence** algorithm to learn and evolve in real-time, providing the engine with the capabilities of **Predictive Detection**.

This algorithm works conjointly with **Behavioral Detection** technology that monitors and tracks the activities of each program. This technology further blocks the program immediately if its behavior is found suspicious. GoDeep.AI, with its advanced technology, protects users from threats that have never occurred before **Zero Day attacks**.

SIA, Your virtual assistant

We understand that sometimes it is difficult to understand security alerts or fix technical issues, which can make it harder to use all the protection and features to their full potential that Quick Heal provides.

SIA – your Security Assistant for a simpler, stress-free experience.

It provides:

Instant Answers

Step-by-step help for common queries.

Feature Walkthroughs

Easy instructions for using key features.

Problem Solving

Quick fixes for all your issues.

Product Awareness

Recognizes your product version & suggests enhancements.

Human-like Conversations

Friendly, jargon-free explanations.

SIA makes security simple, stress-free, and interactive.

Experience AI powered **Digital Privacy & Safety** with Quick Heal Internet Security.

Browsing Protection

Key Benefits:

- ✓ **SIA**, your Security Assistant for a simpler, stress-free experience.
- ✓ **Privacy-First Protection** with digital identity, personal data, and more guarded at all times.
- ✓ Smarter real-time protection with **AI-powered threat detection**.
- ✓ **metaProtect** helps you manage multiple devices, privacy alerts, fully giving you remote control from one console.
- ✓ **Fearless Digital Experience** with safe banking, fake website/apps protection, fraud prevention, ransomware defense, malware protection and more.
- ✓ **Lightweight Performance** with Antivirus that runs silently in the background without slowing down your device.

Product Highlights

SIA (Security Intelligent Assistant)

A built-in chatbot that answers your security queries.

Gives you alerts and fixes in simple, jargon-free language, and step by step walkthrough and solutions. Available 24 X 7.

One login. All devices. Protection simplified

- Get a synchronized security experience across all your devices with our cloud platform.
- Map your family's devices to a single metaProtect account to manage your device security remotely and in real-time.
- Access a holistic view of your device security, privacy, and receive instant breach alerts.
- Centrally manage licensing, including renewals and upgrades, for added convenience.

Restrict inappropriate websites for your children

Smart Parenting

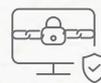

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks websites and apps with them from online threats. Their safety is in your hands.

Pay bills, transfer money online, and do banking without fear

Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

Prevent ransomware attempts

Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

Stay protected with robust scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.

Digital Safety Made Easy

Security Score

- Provides insight on your risk situation and security status along with helpful tips for enhancing device security.

Privacy Score

- Offers insights into your personal data risks and gives useful tips to strengthen and protect your privacy and identity in the digital world.

Surf the Internet safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Scam Protection

- Detects deceptive and phishing attempts instantly that try to steal your data in disguise. You never fall prey to data phishing.

Intuitive Workflows and Reports

- Get real time, easy-to-understand visual snapshots of your digital wellbeing reports, along with recommendations to improve your digital safety and online privacy.

Secure email communications

Email Protection

- Prevents malwares coming through emails.

Spam Protection

- Blocks spam emails and malware infected attachments.
